

Construction and Demolition Waste Reduction Plan Waiver

Town of Atherton
Building Department
80 Fair Oaks Ln
Atherton, California 94027
Phone: (650) 752-0560
Inspection requests:
(650) 752-0542

The Town of Atherton, Municipal Code Section 15.52.120, requiring all construction, demolition and landscape projects to reuse and/or recycle all waste generated. Your project has been determined to qualify for a waiver due to the valuation being less than \$50,000.00, generating less than 10 tons of debris, or as determined by the Building Official.

However, as a condition of this waiver, the Town requires that you agree to maximize reuse and/or recycling of waste material generated by your project by performing the following:

- Small Construction and Demolition Project:
 - I agree to salvage reusable materials to the maximum extent possible, and;
 - I agree to separate non-salvageable materials into clean, consistent loads for recycling where feasible, particularly if I am generating a proportionately large amount of particular material. (eg; scrap wood or green waste.)
- Pool, Excavation and other Projects generating Primarily Inert Materials:
 - I agree to keep dirt, concrete, and asphalt free of vegetation and other contaminants, and to deliver them to a facility that specializes in the recycling of inert materials (see attached list)
- Landscape Project:
 - I agree to keep vegetation segregated and free of contaminants such as plastic, rock, excessive dirt, etc. and deliver it to a facility that specializes in recycling green waste (see attached list)

Additionally, I agree to take any mixed debris to a facility that can process it for recycling.

"I have read and understand the above points and agree to reuse and recycle waste materials on my project to the maximum extent possible."
