

## Item No. 24 Town of Atherton

### **CITY COUNCIL STAFF REPORT – REGULAR AGENDA**

**TO:** HONORABLE MAYOR AND CITY COUNCIL  
GEORGE RODERICKS, CITY MANAGER

**THROUGH:** ROBERT OVADIA, PUBLIC WORKS DIRECTOR

**FROM:** SALLY BENTZ DALTON, TOWN ARBORIST

**DATE:** SEPTEMBER 19, 2018

**SUBJECT:** ADOPTION OF A TREE INSPECTION AND RISK MANAGEMENT POLICY FOR TOWN MAINTAINED TREES; AND REVIEW, DISCUSSION AND DIRECTION ON RESPONSIBILITY FOR MAINTENANCE OF TREES ALONG MIDDLEFIELD ROAD AND MARSH ROAD

### **RECOMMENDATION**

1. Adopt the attached Tree Inspection and Risk Management Policy for Town Maintained Trees; and
2. Review, discuss and provide direction on the responsibility for maintenance of trees along Middlefield Road and Marsh Road

### **BACKGROUND**

#### Tree Policy

The Town works with ABAG to advance risk management principles and practices and effectively manage risk through loss exposure identification and loss control. ABAG's Risk Management Department works closely with the Town's Risk Manager to review claims and examine past experience, current exposures, and emerging trends to tailor an effective program aimed at preventing claims. Each year the Town works with ABAG to identify risk management goals and objectives that focus on best practices. During the 2015/2016 program year the ABAG Pooled Liability Assurance Network (PLAN) Risk Management Assessment focused on Urban Forest Management as an operational best practice for the fiscal year. ABAG worked with the Town to assess best practices and the assessment demonstrated that the Urban Forest Management plan needed work, particularly in developing a policy that established procedures for inspection and preventative maintenance of Town owned trees.

The Tree Inspection and Risk Policy for Town Maintained Trees establishes guidelines and procedures to inspect and manage trees maintained by the Town in order to promote the health,

safety, welfare, and quality of life for all Town residents and visitors. Private trees are not subject to this policy and shall be under the care and responsibility of the private property owner. Trees maintained by the Town were inventoried by West Coast Arborists Inc. in May 2018. It was found that this policy will cover 1,254 trees, with 856 of those located in Holbrook-Palmer Park.

### Middlefield Road and Marsh Road Trees

Atherton Municipal Code Chapter 12.06 places the responsibility for maintaining the lot frontage strip portion of the public right-of-way on adjoining property owners. This includes vegetation and tree maintenance as well as tree removals pursuant to Town permitting requirements.

The Town has historically maintained the trees along Middlefield Road, including watering (manual using water truck), pruning, removal of dead trees and replanting. Though the Town has not historically maintained the trees along the south side of Marsh Road, between the channel and the property line fences, a property owner requested that the Town take on the responsibility of maintaining these trees citing concerns regarding poison ivy and the steepness of the area adjacent to the channel.

## **ANALYSIS**

### Tree Policy

The Town does not currently have a formal policy regarding the inspection and maintenance of Town owned trees. The proposed tree maintenance policy will allow the Town to pro-actively catch defects and maintenance needs at the time of inspection and direct required maintenance, schedule follow up inspections, future work needs or removal if required to preserve the health, safety, welfare, and quality of life Town residents and visitors. If it is determined by the Director and Town Arborist for a Town maintained tree to be removed, the policy will require that a replacement tree be planted.

This policy, which requires replacement of Town maintained trees will allow Atherton to keep up with the Tree City USA designation as the Town removed approximately 90 trees in the last few years. Town maintained trees have all been inventoried to provide for easier identification by staff to locate the trees, respond to complaints, log inspections and maintenance activities.

The draft policy has been attached to this report along with the Town Tree inventory.

### Middlefield Road Trees

Historically, the Town of Atherton has watered, pruned and planted trees along the east side of Middlefield Road from Marsh Road to Oak Grove Avenue. There are currently 159 trees in the Right of Way along the east side of Middlefield Road. Should the Council decide to revert maintenance to the fronting property owners, it is unlikely that the trees along this route will be adequately watered and maintained to protect the health of the trees and the scenic nature of the route. Additionally, the Town cannot impose the maintenance responsibility along the Menlo-Atherton High School frontage to the school district. It is recommended that the Town continue

to maintain these trees. Should the Council decide to retain maintenance responsibility of these trees, the 159 trees will be added to the Town Tree Inventory.

### Marsh Road Trees

Maintenance of the trees along the southside of Marsh Road, between the channel and the property lines, have been the responsibility of the adjacent property owners. Access to maintain this area from the right-of-way is limited due to the location of the adjacent channel. Though the Town changed the configuration of the channel, from battered sides to vertical sides, it did not steepen the slope of the area between the channel and the property line fences. In addition to the trees, there is a significant amount of ivy and other vegetation in the area. It is recommended that the property owners retain maintenance responsibility of the area. Should the Council decide to accept maintenance responsibility of these trees, staff would need to inventory the trees to include them in the Town Tree Inventory.

### POLICY FOCUS

The Council should focus discussion on the policy issues related to the management of risk associated with Town maintained trees, and if additional trees should be accepted for maintenance by the Town. The proposed policy allows the Town to follow American National Standards Institute (ANSI) standards for Pruning and Tree Risk.

### FISCAL IMPACT

The current budget includes funds for the maintenance of trees in the attached Town Tree Inventory as well as the trees on the east side of Middlefield Road. If the trees along the south side of Marsh Road were accepted for maintenance, additional funds would be needed to inventory and inspect the trees as well as to provide for pruning and maintenance are determined by the inspections.

### PUBLIC NOTICE

Public notification was achieved by posting the agenda, with this agenda item being listed, at least 72 hours prior to the meeting in print and electronically. Information about the project is also disseminated via the Town's electronic News Flash and Atherton Online. There are approximately 1,200 subscribers to the Town's electronic News Flash publications. Subscribers include residents as well as stakeholders – to include, but be not limited to, media outlets, school districts, Menlo Park Fire District, service providers (water, power, and sewer), and regional elected officials.

### COMMISSION/COMMITTEE FEEDBACK/REFERRAL

This item \_\_\_\_ has or  X  has not been before a Town Committee or Commission.

- Audit/Finance Committee (meets every other month)
- Bicycle/Pedestrian Committee (meets as needed)
- Civic Center Advisory Committee (meets as needed)

- Environmental Programs Committee (meets every other month)
- Park and Recreation Committee (meets each month)
- Planning Commission (meets each month)
- Rail Committee (meets every other month)
- Transportation Committee (meets every other month)

### **ATTACHMENTS**

Attachment 1 - Tree Inspection and Risk Management Policy

Attachment 2 - Town Tree Inventory

Attachment 3 – Middlefield Road (eastside) Tree Inventory

---

## TREE INSPECTION AND RISK MANAGEMENT POLICY

### I. PURPOSE

This policy establishes guidelines and procedures to inspect and manage Town trees in order to promote the health, safety, welfare, and quality of life for all Town residents and visitors. Private trees are not subject to this policy and shall be under the care and responsibility of the private property owner.

### II. AUTHORITY AND RESPONSIBILITY

This policy was adopted by the City Council on \_\_\_\_\_ for use in the management of risk for Town trees. Inspection of Town trees shall be the responsibility of an Arborist certified by the International Society of Arboriculture under the direction of the Public Works Director. The Director is responsible for maintenance, removal, replacement, and planting of Town trees and may delegate that responsibility in writing.

### III. DEFINITIONS

For the purposes of this policy the following definitions shall apply:

- A. Arborist: a person designated as such by the Director of Public Works who has demonstrated knowledge and competency by holding a current International Society of Arboriculture arborist certification.
- B. Director: the Director of Public Works or a person designated as such in writing by the Director of Public Works.
- C. Inspection. An inspection of a tree using either the Level 1, Level 2, or Level 3 assessment methodology summarized in Appendix A.
- D. Private Trees: Any tree on private property or on a Town street or right of way other than those specified in the Town Tree Inventory.
- E. Risk Manager: The City Manager or person designated by the City Manager as Risk Manager.
- F. Target: People, objects (e.g. vehicles, structures, etc.) or locations that could be subject to damage by a tree.
- G. Town tree: Any tree that is identified in Appendix B - Town Tree Inventory 2018. All other trees are Private trees.
- H. Unsafe Condition: Any circumstance in which there is an imminent risk of all or part of a tree falling or otherwise acting on a target in a manner that would pose an imminent risk of injury or damage to persons or property.

---

#### **IV. TREE INVENTORY**

The Director shall develop and maintain a tree inventory listing the following information for each Town tree:

- Species
- Diameter at 54" (diameter at breast height - dbh)
- Location
- Condition
- Recommended Maintenance Needs

The inventory shall be periodically updated by the Director.

#### **V. TREE INSPECTIONS**

All Town trees shall be inspected as set forth below.

A record of inspections shall be kept by the Arborist.

For each tree, the inspection report shall note defects and whether follow-up maintenance other than standard maintenance is required and, if so, the date by which that maintenance should be completed. Where the recommended maintenance is not feasible, the Director and the Arborist shall identify and carry out alternative measures to address the circumstances leading to the recommendation. Follow up work will be described in the inspection record with the completion date and confirmation that the work was completed.

Inspections of Town trees shall be Level 1 inspections either on foot or by vehicle in accordance with ANSI A300 (Part 9) – 2011 Tree Risk Assessment. If a Level 1 inspection identifies a need for additional inspection, a Level 2 inspection will occur.

Schedule of Inspections:

- A. The Director shall ensure that each Town tree is inspected at least once every 5 years.
- B. As Needed Inspections --The Arborist will inspect Town trees that are reported to be potentially at risk by members of the public or Town staff regardless of the size of the tree. If such inspection reveals signs of stress or damage, surrounding and nearby Town trees will also be inspected by the Arborist to assure acceptable condition. The Arborist may accelerate the frequency of scheduled inspections to address "at risk" or deteriorating conditions identified during any inspection.

---

## **VI. TREE MAINTENANCE GUIDELINES**

All Town trees shall be maintained as set forth below. A record of maintenance shall be kept by the Director.

### **A. Pruning**

All work on Town-owned trees shall be in accordance with the most current edition of the following industry standards: ANSI A300 (Part 1) – 2001 Pruning, and ANSI Z133.1-2006. State and federal regulations prohibit the disturbance and destruction of many active bird nests. November through February is the optimal time to prune in order to avoid bird nests.

### **B. Insect And Disease**

If trees are infested with pests or infected with a disease and treatment is warranted, the problem shall be identified and targeted with a specific and timely treatment. If the pest or disease situation creates an unsafe condition, measures to mitigate risk will be taken. Those measures include pruning out diseased portions of the tree, or removal of the tree if warranted as determined by the Arborist in accordance with section VII of this policy.

### **C. Fruit Control**

If fruit production of a City tree becomes an unsafe condition the Director shall undertake appropriate fruit control measures.

## **VII. TREE REMOVAL**

At the direction of the Town Arborist and approval by the Director.

## **VIII. REPLACEMENT AND PLANTING OF TREES**

The Director shall replace City trees that are removed with the same or a similar species in the same general location unless soil, terrain, planned improvements or other conditions make another type or location for planting more appropriate.

In locations where new trees are needed the species of new trees shall be approved by the Arborist and shall meet International Society of Arboriculture guidelines. Selection criteria will include, but not be limited to, height and size at maturity with resulting impact on hardscapes, curbs, gutters, walkways, and utilities, predicted longevity, and maintenance requirements.

## **XIX. COMPLAINT RESPONSE**

- 
- A. Complaints regarding Town trees will be documented by the Town Arborist. Copies of the complaint will be provided to the Director (with a copy to the Risk Manager) who shall determine the appropriate response to the complaint.
- B. The Town will endeavor to respond to complaints about Town trees within five (5) business days of receipt of complaint, not including days that Town offices are closed. If a complaint concerns a tree that the complainer believes poses an immediate threat to public health and safety and Town offices are closed, the complaint shall be filed with the Police Department at the non-emergency line 650-688-6500.

## Appendix A – Description of Assessment Levels

Process of a Level 1: Limited Visual Assessment - Assessed only when there is a complaint

- Identify location or selection criteria of trees to be assessed
- Determine most efficient route and document the route taken
- Assess the tree(s) of concern from the defined perspective
- Identify trees needing a higher level of assessment and/or prompt action
- Document tree inspection and recommended actions

Process of a Level 2: Basic Assessment – Assessed every 5 years

- Locate and identify trees to be assessed
- Determine the targets and target zone for the tree or branches of concern
- Review site history, conditions, and species failure profile
- Assess general tree health
- Inspect tree visually – use of mallet, probe or binoculars ok
- Determine mitigation options and estimate residual risk for each options
- Document findings including likelihood and consequences of failure

Process of a Level 3: Advanced Assessment – may include some or all of the following  
Assessed if tree needs removal

- Site evaluation
- Target analysis
- Aerial inspection
- Health evaluation
- Testing for decay using boring/resistance/sonic/electrical impedance tomography or other methods as specified
- Analysis of storm/wind load
