

Colleague's Memo to Access Reach Codes Proposed by PCE

Over the past year, twelve of the twenty cities in San Mateo County have adopted some version of the Reach Codes that were proposed by Peninsula Clean Energy over the past 18 months. PCE still offers each SMC city \$10,000 to consider adopting Reach Codes or some modified version of the Reach Codes. Atherton never looked at the specific proposals suggested by PCE. Over the past year, PCE staff have greatly refined their approach to Reach Codes and options that cities can consider, including the options that various SMC cities have selected. We believe that Atherton should reconsider the proposed Reach Codes and take advantage of the \$10,000 offer from PCE.
