Dear Anthony,

I have lived in Atherton for several years and frequently visit 1 Elm Place and am familiar with the three trees that are being reviewed by the council. Frankly, it's obvious that the trees are just too big and in the wrong location on their lot. Given the shape of the property, and the power lines in the back, the trees should never have been planted where they are because they make it impossible to place a house on their lot. I am therefore supportive of removing these trees so they can fully enjoy their property.

Also, their property looks like a forest with several very large redwood trees, and taking down three trees, with their proposed replanting, will make Atherton an even more forested community.

I strongly support their application for tree removal and encourage the council to support it as well.

Susan Fradin
